ADD 8

ADD 8" CI Borewell Cap

Flat-profile 8" plate with a narrow central split clamp and twin cable notches.

Sizes	Minimum order	Lead time	Price
8"	**25 pieces**	**10 - 14 days**	**Quoted per order**

What this part is

An 8" borewell cap closes the casing on large agricultural and municipal bores. The flat ADD profile keeps the casting weight down on a plate this wide.

Specification

Pattern	ADD
Nominal size	8 inch
Profile	Flat plate, raised clamp spine
Cable notches	2, opposed
Material	Grey cast iron FG 200
Clamp type	Integral split, two-bolt
Finish	Shot blasted, enamel painted

Material

- Grey Cast Iron FG 200 / FG 260 (IS 210)

Typical applications

- Municipal tubewells
- Large agricultural bores
- Bore fields with panel-side cable routing

How we make it

A wide, flat plate with a narrow raised spine carrying the split clamp. Cable notches are cast above and below the clamp bore so cable can be routed on whichever side the control panel sits. The large flat face gives a clean seat on the casing collar.

Questions

Which column pipe size does the 8" borewell cap fit?

The 8" cap is bored to clamp the column pipe size stamped on the casting. Confirm your column pipe outside diameter when ordering - we machine the clamp bore to suit 1" to 3" column pipe on request.

Is the clamp strong enough to hold the pump assembly?

Yes. The split clamp is cast as part of the plate, not welded on, and is tightened with two high-tensile bolts. It is rated to carry the hanging weight of the column pipe, cable and submersible pump for the size it is supplied against.

What finish is supplied as standard?

Standard supply is shot-blasted and enamel painted in our green finish. Primer-only, black bitumen and hot-dip galvanised finishes are available against bulk orders.

To order

Send us four measurements and we can quote first time: bore casing outside diameter, column pipe outside diameter, approximate column run in metres, and cable type. Clamp bores are machined to your column pipe.
